abishek202417@gmail.com | 6383869868

A passionate third-year Computer Science and Engineering student with Basic Python programming skills acquired through Udemy, eager to apply theoretical knowledge and practical experience to address real-world challenges in the tech industry. Committed to continuous learning and growth in computer science.

---

## Education

---

**Kings Engineering College**  
**BE(Computer Science and Engineering) - CGPA: 7.64**

**08/21 - Current Education**

- Computer Science Introduction
- Data Structures & Algorithms
- Python Programming (Self-study via Udemy)

---

## Key Skills

---

- Proficient in Python (Self-Study through Udemy)
- Basic understanding of programming concepts
- Strong analytical and problem-solving skills
- Effective team player with excellent communication abilities

---

## Objective

---

- Seeking to secure an internship or entry-level position in a dynamic tech-oriented company that fosters innovation, allowing me to apply and expand my knowledge in computer science. Aspiring to grow and evolve within the industry while contributing meaningfully to the development of cutting-edge technologies.

---

## Interests

---

- Exploring new programming languages and technologies
- Participating in hackathons and coding competitions
- Reading tech blogs and staying updated on industry trends
- Volunteering for community tech education initiatives
